

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building scalable, production-grade web applications using React.js, Node.js, Express.js, PostgreSQL, and MongoDB. Skilled in designing secure REST APIs, real-time systems, and role-based authentication across enterprise and healthcare-focused platforms. Strong foundation in data structures, algorithms, and system design, with a proven ability to translate complex technical requirements into reliable, user-centric software.

TECHNICAL SKILLS

Languages: C++, C, Python
Frontend: React.js, Tailwind CSS, TanStack Start, Responsive Design
Backend: Node.js, Express.js, REST API Design, JWT Authentication, WebSockets
Databases: PostgreSQL, MongoDB, Redis, Supabase
Tools: Docker, Firebase, Git, GitHub, VS Code
Core Concepts: Data Structures & Algorithms, OOP, DBMS, System Design Fundamentals

PROFESSIONAL EXPERIENCE

Full Stack Development Intern — Maruti Suzuki India Limited May 2026 – Jul 2026

Gurugram, Haryana

- Researched application-to-rack dependency mapping and built App2Rack Infra Control, a full-stack infrastructure management platform (CMDB + observability + AI ops) using TanStack Start, React.js, Tailwind CSS, and PostgreSQL, with modules for applications, servers, racks, incidents, and audit logs, plus a visual topology graph for dependency mapping.
- Developed real-time dashboards, incident tracking, and capacity-planning calculators; containerized the application with Docker and deployed it on Cloudflare.
- Integrated AI-powered log analysis, root cause analysis, and optimization advisory through a credit-gated system with a wallet and usage analytics dashboard.
- Implemented role-based access control, bulk CSV data import, and a tiered subscription/billing system with a scenario switcher for demos, and authored infrastructure reports to support engineering visibility.

Web Development Intern — Maruti Suzuki India Limited May 2025 – Jun 2025

Gurugram, Haryana

- Developed the Control Number Data Updation System (ongoing project) using ASP.NET Web Forms and Oracle PL/SQL to log and manage vehicle fault records, replacing a manual, paper-based process.
- Designed a dynamic two-page interface for defect reporting and built PL/SQL packages and stored procedures to handle data operations, enforce validation rules, and support real-time field updates.
- Improved the accuracy and efficiency of internal workflows by automating data entry, minimizing manual errors, and integrating frontend forms with complex backend logic.

PROJECTS

RapidResQ — AI-Enabled Emergency Response & Healthcare Coordination System

React.js · Node.js · PostgreSQL · MongoDB · Redis · WebSockets

- Architected a full-stack platform connecting patients, hospitals, and ambulances with real-time location tracking and instant notifications via WebSockets.
- Built an AI-based triage module to auto-prioritize incoming emergency cases by severity, reducing reliance on manual dispatch decisions.
- Designed secure REST APIs with JWT authentication to safeguard patient and case data across the platform.
- Combined PostgreSQL and MongoDB in a hybrid data layer, balancing relational integrity for core records with flexible schema design for case and event logging; deployed the platform on Cloudflare.

SkyWay — Multi-Role Airline Operations Platform

TanStack Start · React 19 · Supabase · Tailwind CSS

- Built and deployed on Cloudflare a unified airline platform with four role-based experiences (Passenger, Ops, Support, Admin) under one design system and auth flow, with typed redirects and role-guarded portal layouts.
- Developed a 12+ route Operations Control Center with live flights, delays, and weather, including an AI Copilot that delivers structured recommendations drilling through to Flights/Analytics via typed URL params.
- Built a Support portal with ticketing, audit trails, and secure signed-URL file attachments with RLS-enforced access and mime/size validation.
- Designed an Admin portal (fleet, routes, pricing, security, analytics) on Postgres with RLS and a security-definer role system to prevent privilege escalation.

EDUCATION

B.Tech, Computer Science Engineering — VIT Bhopal University Sept 2023 – Present

Bhopal, Madhya Pradesh · CGPA: 8.58 / 10

Class XII (CBSE) — The Heights Sr. Sec. School 2023

Jhajjar, Haryana · 85%

Class X (CBSE) — G D Goenka Public School 2021

Jhajjar, Haryana · 90.6%

ACHIEVEMENTS & CERTIFICATIONS

- Cleared inter-college rounds of Smart India Hackathon (SIH)
- The Bits and Bytes of Computer Networking — Google (Coursera), 2025
- AWS Cloud Technical Essentials — Amazon Web Services(Coursera)
- Meta Back-End Developer Professional Certificate — Meta (Coursera)
