

PRIYA

Computer Science Undergraduate | Software Engineer

Jhajjar, Haryana, India | +91-8607707478 | sehwatpriya430@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in software engineering, building and deploying full-stack applications using React.js, JavaScript, Node.js, PostgreSQL, REST APIs, authentication, Docker, and real-time systems. Industry experience at Maruti Suzuki India Limited with practical frontend, backend, database, and deployment work.

TECHNICAL SKILLS

Languages: C++, JavaScript, SQL

Frontend: HTML, CSS, React.js, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST API Design, JWT Authentication

Databases: PostgreSQL, MongoDB, Redis, Supabase

Tools: Docker, Git, GitHub, Firebase

Core Concepts: Data Structures & Algorithms, OOP, DBMS, System Design

PROFESSIONAL EXPERIENCE

Software Development Intern — Maruti Suzuki India Limited | [GitHub](#)

(May 2026 – Jun 2026)

Gurugram, Haryana

- Built App2Rack Infra Control, a full-stack infrastructure platform mapping applications to servers and physical racks using React.js, TanStack Start, Tailwind CSS, and PostgreSQL.
- Developed App2Rack, an infrastructure intelligence platform for monitoring fleet health, incident trends, rack utilization, and application-to-server dependency mapping in a single operational dashboard.
- Engineered a secure full-stack system with React, TypeScript, TanStack Router/Query, Express.js, and PostgreSQL, implementing JWT-based authentication, protected routes, input validation, rate limiting, and structured database migrations.
- Integrated AI-assisted log analysis, optimization advisory workflows, generated reports, audit trails, and CSV/XLSX ingestion to support incident response, operational insights, and deployment-ready infrastructure monitoring.

Web Development Intern — Maruti Suzuki India Limited

(May 2025 – Jun 2025)

Gurugram, Haryana

- Developed the Control Number Data Updation System (ongoing project) using ASP.NET Web Forms and Oracle PL/SQL to log and manage vehicle fault records, replacing a manual, paper-based process.
- Designed a dynamic two-page interface for defect reporting and built PL/SQL packages and stored procedures to handle data operations, enforce validation rules, and support real-time field updates.
- Improved the accuracy and efficiency of internal workflows by automating data entry, minimizing manual errors, and integrating frontend forms with complex backend logic.

PROJECTS

RapidResQ — AI-Enabled Emergency Response & Healthcare Coordination System | [GitHub](#)

- Developed a full-stack emergency healthcare platform using React, TypeScript, Vite, Supabase Auth, PostgreSQL, and role-based routes for patients, doctors, hospitals, operators, and drivers.
- Engineered real-time ambulance dispatch workflows with geolocation tracking, nearest-driver selection, Supabase Realtime booking updates, operator dashboards, hospital intake, and driver trip-status management.
- Integrated AI-assisted healthcare chat through authenticated Supabase Edge Functions and Gemini, plus WebRTC consultations, streaming responses, voice input/output, and WhatsApp notifications.

SkyWay — Multi-Role Airline Operations Platform | [GitHub](#)

- Developed a full-stack airline operations platform that unifies flight booking, passenger management, real-time flight status, baggage tracking, customer support, administrative operations, and AI-assisted workflows.
- Built responsive, role-based interfaces for passengers, airline staff, administrators, operations teams, and support agents using React and TypeScript.
- Implemented secure backend APIs and database workflows for flights, bookings, passengers, notifications, feedback, payments, and operational management.
- Integrated AI-powered features to support intelligent search, operational insights, passenger assistance, and streamlined airline decision-making. Added real-time flight updates, notification centers, route visualization, weather and travel information, calendar integration, Stripe payments, and booking confirmations.

EDUCATION

B.Tech, Computer Science Engineering — VIT Bhopal University

(Sept 2023 – Present)

Bhopal, Madhya Pradesh . **CGPA-8.59**

Class XII (CBSE) — The Heights Sr. Sec. School

(2022-2023)

Jhajjar, Haryana . **85%**

Class X (CBSE) — G D Goenka Public School

(2020-2021)

Jhajjar, Haryana . **90.6%**

ACHIEVEMENTS & CERTIFICATIONS

- The Bits and Bytes of Computer Networking — Google (Coursera), 2025
- AWS Cloud Technical Essentials — Amazon Web Services (Coursera)
- Cleared inter-college rounds of Smart India Hackathon (SIH)
